1. NATURE OF OPERATIONS AND GOING CONCERN

Sonoro Metals Corp. ("Sonoro" or the "Company") was incorporated in Ontario on November 30, 1944 under the *Company Act* of Ontario. On January 15, 2007, the Company was issued a Certificate of Continuation by the Province of British Columbia. On December 20, 2011, the Company changed its name from Becker Gold Mines Ltd. to Sonoro Metals Corp, which took effect on January 6, 2012. The Company's principal business activity is the acquisition, exploration and development of exploration and evaluation assets. The Company is a publicly-traded company listed on the TSX Venture Exchange ("TSX-V") under the symbol "SMO".

The head office, registered address and records office of the Company is located at 480 – 789 West Pender Street, Vancouver, British Columbia, Canada, V6C 1H2.

The Company incurred a net loss of $161,112 for the six months ended June 30, 2014 (2013 - $115,794). As at June 30, 2014, the Company had an accumulated deficit of $2,044,555) (December 31, 2013 - $1,941,778) with working capital of $542,117 (December 31, 2013 - $687,914).

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes the Company will realize its assets and discharge its liabilities in the normal course of business. These condensed interim consolidated financial statements do not include any adjustments related to the recoverability of assets and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

The Company has no source of revenue, and has significant cash requirements to meet its administrative overhead and to finance mineral property acquisitions and future exploration. The Company does not generate cash flow from operations to adequately fund its activities and has therefore relied principally upon the issuance of securities for financing. The Company intends to continue relying upon the issuance of securities to finance its future activities, but there can be no assurance that such financing will be available on a timely basis under terms acceptable to the Company. Although these condensed interim consolidated financial statements do not include any adjustments that may result from the inability to secure future financing, such a situation would have a material adverse effect on the Company's business, results of operations and financial condition.

These condensed interim consolidated financial statements were approved by the board of directors for issue on August 15, 2014.

2. BASIS OF PRESENTATION

Statement of Compliance

These condensed interim consolidated financial statements have been prepared by management in accordance with IAS 34 *Interim Financial Reporting* ("IAS 34") using accounting principles consistent with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB").

The significant accounting policies applied in preparing these condensed interim consolidated financial statements are consistent with the accounting policies as disclosed in the Company's audited consolidated financial statements for the year ended December 31, 2013 with the exception of the new accounting policies disclosed in note 3 below.

These condensed interim consolidated financial statements do not include all of the required disclosures for annual consolidated financial statements. Accordingly, they should be read in conjunction with the Company's consolidated financial statements for the year ended December 31, 2013 and the notes thereto.

Basis of Measurement

These condensed interim consolidated financial statements have been prepared on a historical cost basis, except for cash and cash equivalents and other financial instruments classified as fair value through profit or loss or available-for-sale that have been measured at fair value, and are presented in Canadian dollars.

Basis of consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its wholly-owned integrated subsidiaries, Cap Capital Corp. and Minera Mar Plata S.A. de C.V. ("MMP"). All significant intercompany transactions and balances have been eliminated.

3. SIGNIFICANT ACCOUNTING POLICIES

Changes to accounting policies

The following accounting standards and amendments to existing standards were adopted effective January 1, 2014:

IAS 32 *Financial Instruments: Presentation* clarifies certain aspects because of diversity in application of the requirements on offsetting, focused on four main areas:

- The meaning of “currently has a legally enforceable right of set-off”;
- The application of simultaneous realization and settlement;
- The offsetting of collateral amounts; and
- The unit of account for applying the offsetting requirements.

Amendments to IAS 36 *Impairment of Assets* reduces the circumstances in which the recoverable amount of assets or cash-generating units is required to be disclosed, clarifies the disclosures required and introduces and explicit requirement to disclose the discount rate used in determining impairment (or reversals) where the recoverable amount (based on fair value less costs of disposal) is determined using the a present value technique.

The adoption of these standards has not had a significant impact on the Company’s financial position or financial performance.

Changes in accounting standards not yet adopted

Accounting Standards Issued where the Adoption Date is not Specified

IFRS 9 *Financial Instruments* replaces the current standard IAS 39 *Financial Instruments: Recognition and Measurement,* replacing the current classification and measurement criteria for financial assets and liabilities with only two classification categories: amortized cost and fair value.

The Company anticipates that the application of these standards, amendments and interpretations will not have a material impact on the results and financial position of the Company.

(Expressed in Canadian Dollars)

4. FINANCIAL INSTRUMENTS

The Company has classified its cash and cash equivalents as fair value through profit and loss; receivables, as loans and receivables; and accounts payable and accrued liabilities and due to related parties, as other financial liabilities.

Fair value

The carrying values of accounts payable and accrued liabilities and due to related parties approximate their fair values due to the short-term nature of these financial instruments.

Credit risk

The Company is exposed to credit risk with respect to its cash. Cash has been placed on deposit with major Canadian and Mexican financial institutions. The risk arises from the non-performance of counterparties of contracted financial obligations. The Company is not exposed to significant credit risk on receivables as these amounts are due from government agencies.

Concentration of credit risk exists with respect to the Company's cash as the majority of the amount is held with only a few Canadian and Mexican financial institutions. The Company's concentration of credit risk and maximum exposure thereto at June 30 is as follows:

	2014	**2013**
Cash held at major Canadian financial institutions	$ 605,767	$ 926,864
Cash held at major Mexican financial institutions	11,599	18,073
Total cash	$617,366	$ 944,937

Included in cash and cash equivalents at June 30, 2014, are two cashable guaranteed investment certificates: 1) $510,000 earning interest at prime less 1.95%, maturing March 20, 2015; 2) $78,000 earning interest at prime less 1.85%, maturing August 7, 2014.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company had working capital as at June 30, 2014 in the amount of $542,117 (December 31, 2013 - $687,914).

4. FINANCIAL INSTRUMENTS (Continued)

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

(i) Interest rate risk

The Company's cash and cash equivalents consist of cash held in bank accounts. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values as of June 30, 2014.

(ii) Foreign currency risk

The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in Canadian dollars.

The Company is exposed to foreign currency risk with respect to cash and cash equivalents, receivables, due to related parties, and accounts payable and accrued liabilities as a portion of these amounts are denominated in US dollars and Mexican pesos. The Company has not entered into any foreign currency contracts to mitigate this risk.

As at June 30, 2014 and December 31, 2013, the Company's significant exposure to foreign currency risk, based on consolidated statement of financial position carrying values, were to the Mexican peso and the US dollar, as follows:

	June 30, 2014	
	MXP	USD
Cash	57,624	7,341
Accounts payable and accrued liabilities	(149,466)	-
Net	(91,843)	7,341
Canadian dollar equivalent	$ (398)	$ 6,876

	December 31, 2013	
	MXP	USD
Cash	151,132	1,777
Accounts payable and accrued liabilities	(149,466)	-
Net	1,666	1,777
Canadian dollar equivalent	$ 128	$ 1,786

(Expressed in Canadian Dollars)

4. FINANCIAL INSTRUMENTS (Continued)

Market risk (continued)

(ii) Foreign currency risk (continued)

The sensitivity analysis of the Company's exposure to foreign currency risk suggests that a 5% change in foreign exchange rates between the Mexican peso, US dollar and Canadian dollar would not have a material impact on loss and comprehensive loss for the period ending June 30, 2014 and the year ending December 31, 2013.

(iii) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not exposed to significant other price risk.
