Notes to the condensed interim consolidated financial statements

For the nine months ended September 30, 2023

(Expressed in Canadian Dollars) (Unaudited)

1. NATURE OF OPERATIONS AND GOING CONCERN

Sonoro Gold Corp., formerly Sonoro Metals Corp. (“Sonoro” or the “Company”) was incorporated in Ontario on November 30, 1944 under the *Company Act* of Ontario. On January 15, 2007, the Company was issued a Certificate of Continuation by the Province of British Columbia. The Company’s principal business activity is the acquisition, exploration and development of exploration and evaluation assets. The Company is a publicly-traded company listed on the TSX Venture Exchange (“TSX-V”) under the symbol “SGO”.

The head office, registered address and records office of the Company are located at Suite 300 – 2489 Bellevue Avenue, West Vancouver, British Columbia, Canada, V7V 1E1.

The Company has no source of revenue and has significant cash requirements to meet its administrative overhead and to finance mineral property acquisitions and future exploration. The Company does not generate cash flow from operations to adequately fund its activities and has therefore relied principally upon the issuance of securities for financing. The Company will be required to and intends to continue relying upon the issuance of securities to finance its future activities, but there can be no assurance that such financing will be available on a timely basis under terms acceptable to the Company. The Company incurred a net loss of \$2,774,846 during the nine months ended September 30, 2023 (2022 - \$3,130,372) and has an accumulated deficit of \$28,389,002 as at September 30, 2023 (December 31, 2022 - \$25,614,156). As at September 30, 2023, the Company had a working capital deficiency of \$4,424,549 (December 31, 2022 - \$2,039,537). Although these condensed interim consolidated financial statements do not include any adjustments that may result from the inability to secure future financing, or to the recoverability of assets and classification of assets and liabilities, such a situation would have a material adverse effect on the Company’s business, results of operations and financial condition. These matters indicate the existence of material uncertainties that may cast significant doubt about the Company’s ability to continue as a going concern.

The Company’s business financial condition and results of operations may be further negatively affected by economic and other consequences from Russia’s military action against Ukraine and the sanctions imposed in response to that action in late February 2022. While the Company expects any direct impacts, of the pandemic and the war in the Ukraine, to the business to be limited, the indirect impacts on the economy and on the mining industry and other industries in general could negatively affect the business and may make it more difficult for it to raise equity or debt financing. There can be no assurance that the Company will not be impacted by adverse consequences that may be brought about on its business, results of operations, financial position and cash flows in the future.

The Board of Directors approved these condensed interim consolidated financial statements for issue on November 29, 2023.

2. BASIS OF PREPARATION AND CONSOLIDATION

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as applicable to interim financial reports including International Accounting Standard 34 - Interim Financial Reporting. Therefore, these condensed interim consolidated financial statements do not include all the information and note disclosures required by IFRS for annual financial statements and should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2022 (“Annual Financial Statements”), which have been prepared in accordance with IFRS.

(An Exploration Stage Company)

Notes to the condensed interim consolidated financial statements

2. BASIS OF PREPARATION (Continued)

The accounting policies applied in preparation of these condensed interim consolidated financial statements are the same as those applied in the most recent annual consolidated financial statements and were consistently applied to all the periods presented with the exception of IFRS 16 discussed below.

These condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. All dollar amounts presented are in Canadian dollars, the Company's functional currency, unless otherwise specified.

These consolidated financial statements include the accounts of the Company and its wholly owned integrated subsidiaries, Cap Capital Corp. ("Cap Capital"), Minera Mar de Plata, S.A. de C.V. ("MMP"), Oronos Gold Corp. ("Oronos"), and Minera Breco, S.A. de C.V. ("Breco"). A subsidiary is an entity in which the Company has control, where control requires exposure or rights to variable returns and the ability to affect those returns through power over the investee. All significant intercompany transactions and balances have been eliminated upon consolidation.

Accounting policies

These interim condensed consolidated financial statements follow the same accounting policies and methods of their application as the December 31, 2022 annual audited consolidated financial statements.

Key sources of estimation uncertainty and critical accounting judgement

In preparing these condensed interim consolidated financial statements, management has made judgements and estimates that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expense. Actual amounts incurred by the Company may differ from these values. The significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the Annual Financial Statements.

Value Added Tax ("VAT")

The VAT receivables are generated on the purchase of supplies and services relating to exploration activities and are receivable from the Mexican government. The recovery of VAT involves a complex application process and the timing of collection of VAT receivables is uncertain. Management's assumptions regarding the recoverability of VAT receivable at the end of each reporting period is made using all relevant facts available, including past collectability, the development of VAT policies and the general economic environment of the country to determine if a write-down of the VAT is required. Collection of the amount receivable depends on processing and payment of the claims by the Mexican federal government, which historically has been very slow. While the Company is still pursuing collection, with the delay in processing and collection and no acknowledgement by the Mexican tax authorities regarding the collection of this balance, management determined that an allowance should be provided on the existing VAT receivable, as such, not VAT receivable has been recorded in the Financial Statements. The timing and amount of VAT ultimately collectable could be materially different from the amount recorded in these consolidated financial statements.

A summary of the changes in VAT for the nine months ended September 30, 2023 and the year ended December 31, 2022 are as follows:

VAT receivable	\$
Balance, December 31, 2021	1,396,476

3. CAPITAL MANAGEMENT

The Company's primary objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to be able to identify and continue with the exploration activities on its exploration and evaluation assets. The Company defines capital that it manages as shareholders' equity.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may attempt to issue shares from treasury, which is the Company's primary source of funds. The Company does not use other sources of financing that require fixed payments of interest and principal due to lack of cash flow from current operations and is not subject to any externally imposed capital requirements.

There have been no changes to the Company's approach to capital management during the nine months ended September 30, 2023.

4. FINANCIAL INSTRUMENTS

The Company has classified its cash and cash equivalents as fair value through profit and loss; receivables (excluding input tax credits receivable) as amortized cost, and accounts payable and accrued liabilities and loans and amounts due to related parties, as amortized cost.

Fair value

The carrying values of receivables, accounts payable and accrued liabilities and loans and amounts due to related parties approximate their fair values due to the short-term nature of these financial instruments. Cash and cash equivalents are measured at their market value in accordance with Level 1 of the fair value hierarchy.

(An Exploration Stage Company)

Notes to the condensed interim consolidated financial statements

For the nine months ended September 30, 2023

4. FINANCIAL INSTRUMENTS (Continued)

Credit risk

The Company is exposed to credit risk with respect to its cash and cash equivalents and receivables. The risk arises from the non-performance of counterparties of contracted financial obligations. Credit risk is mitigated as cash and cash equivalents have been placed on deposit with major Canadian and Mexican financial institutions.

Concentration of credit risk exists with respect to the Company's cash and cash equivalents and maximum exposure thereto is as follows:

	September 30, 2023	December 31, 2022
Cash held at major Canadian financial institutions	\$ 201,915	\$ 76,710
Cash held at major Mexican financial institutions	17,263	10,835
Total cash	\$ 219,179	\$ 87,545

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company had working capital deficiency at September 30, 2023 in the amount of \$4,424,549 (December 31, 2022 – \$2,039,537).

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

(a) Interest rate risk

The Company's cash and cash equivalents consist of cash held in bank accounts. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values as of September 30, 2023 and December 31, 2022.

(b) Foreign currency risk

The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in Canadian dollars.

The Company is exposed to foreign currency risk with respect to cash and cash equivalents and accounts payable and accrued liabilities as a portion of these amounts are denominated in US dollars and Mexican pesos. The Company has not entered into any foreign currency contracts to mitigate this risk.

4. FINANCIAL INSTRUMENTS (Continued)

Market risk (Continued)

(b) Foreign currency risk (continued)

As at September 30, 2023 and December 31, 2022, the Company's significant exposure to foreign currency risk, based on the consolidated statement of financial position carrying values, were to the Mexican peso and the US dollar, as follows:

	September 30, 2023	
	MXN	USD
Cash	\$ 221,518	\$ 378
VAT receivable	29,401,477	-
Prepaid expenses	17,660	-
Accounts payable and accrued liabilities	(5,583,291)	-
Loans	(21,690,354)	-
Total	2,367,011	378
Canadian dollar equivalent	\$ 183,846	\$ 511

	December 31, 2022	
	MXN	USD
Cash	\$ 155,072	\$ 12,446
Accounts payable and accrued liabilities	(4,375,347)	(343,589)
Loans	(7,683,038)	-
Total	(11,903,313)	(331,143)
Canadian dollar equivalent	\$ (827,161)	\$ (448,500)

The sensitivity analysis of the Company's exposure to foreign currency risk suggests that a 10% change in foreign exchange rates between the Mexican peso, US dollar and Canadian dollar would impact net income (loss) for the nine months ended September 30, 2023 by approximately \$20,000 (December 31, 2022 - \$94,000).

(c) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not exposed to significant other price risk.

5. RIGHT OF USE ASSET AND LEASE LIABILITY

On December 1, 2021, the Company entered a lease agreement for an office premise which expired on August 30, 2023. The lease liability and right of use asset was measured as the present value of the remaining lease payments, discounted using the Company's incremental borrowing rate. The weighted average incremental borrowing rate applied to the lease liability was 9.9% per annum.

The weighted average incremental borrowing rate applied to the lease liability was 19.0% per annum. The lease term remaining as at September 30, 2023 is approximately 1.34 years.

6. EXPLORATION AND EVALUATION ASSETS (continued)

(c) Realization of assets

The Company's investment in and expenditures on exploration and evaluation assets comprise a significant portion of the Company's assets. Realization of the Company's investment in the assets is dependent on establishing legal ownership of the property interest, on the attainment of successful commercial production or from the proceeds of its disposal. The recoverability of the amounts shown for the exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of the exploration and evaluation assets, and upon future profitable production or proceeds from the disposition thereof.

(d) Title to mineral properties

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history of many exploration and evaluation assets. Although the Company has taken steps to ensure title to the exploration and evaluation assets in which it has an interest, in accordance with industry standards for the current stage of exploration of such assets, these procedures may not guarantee the Company's title. Asset title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

(e) Environmental matters

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its exploration and evaluation assets. The Company conducts its exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current assets that may result in a material liability to the Company.

Environmental legislation is becoming increasingly stringent and the costs of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions.

If the restrictions adversely affect the scope of exploration and development on the exploration and evaluation assets, the potential for production on these assets may be diminished or negated.
